[Company Name]

[Hiring Manager Name - optional]

[Date]

Dear Hiring Manager,

I am excited to apply for the Junior Developer or Junior Data Analyst role at your company. As a recent graduate with academic and practical experience in full-stack development and data analysis, I am eager to contribute to a remote team where I can grow, learn, and make a meaningful impact.

While working as a Junior Software Developer at Universidad de Camagüey, I collaborated on building web applications using Python, Django, and React. I contributed to REST APIs, simplified database queries, and helped build responsive UI components using TailwindCSS. These experiences helped me grow my technical skills and also taught me how to collaborate effectively, manage my time, and stay adaptable when learning new tools or solving problems.

What sets me apart is my proactive mindset and genuine interest in technology. Whether improving workflows as a CNC operator or working with data tools like Pandas, PostgreSQL, and Tableau, I approach every challenge with curiosity and focus.

Thank you for considering my application. I would love the opportunity to learn more about your team and how I can contribute. I'm available for interviews at your convenience and look forward to hearing from you.

Sincerely,

Jesus Canete
